User Persona: Patient Looking for Medical Consultation

THINKS

- I need a reliable doctor for my health issue.
- I want to book appointments without visiting the hospital.
- I hope the appointment process is quick and hassle-free.
- My medical information should remain secure and private.
- I want easy access to my appointment history and reports.

FEELS

- Frustrated when appointments take too long to schedule.
- Worried about finding the right doctor.
- Anxious when appointment confirmations are delayed.
- Relieved when healthcare services are accessible online.
- Confident when personal information is protected.

SEES

- Long queues and waiting times at hospitals.

- Multiple healthcare providers with different booking methods.
- Increasing use of digital healthcare platforms.
- Patients facing difficulties in managing appointments manually.
- The need for a centralized healthcare booking solution.

SAYS

- "I want to book my appointment from home."
- "I need to know which doctors are available."
- "The appointment process should be simple."
- "I don't want to wait in long hospital queues."
- "My medical records should be easily accessible."
- **DOES** Searches online for doctors and healthcare services.
- Compares doctors based on specialization and availability.
- Registers and logs into healthcare platforms.
- Books, tracks, or cancels appointments.
- Uploads and manages medical reports digitally.

PAINS

- Difficulty finding suitable doctors quickly.
- Manual appointment scheduling causes delays.
- Lack of transparency regarding doctor availability.
- Time wasted visiting hospitals for simple bookings.
- Poor organization of medical records and appointment history.

GAINS

- Convenient online appointment booking.
- Faster access to healthcare services.
- Reduced paperwork and administrative effort.

- Secure storage of medical reports and records.
- Better communication between patients and doctors.

Key Insight

Patients need a centralized and user-friendly healthcare platform that allows them to search for doctors, schedule appointments, manage medical reports, and track appointment status efficiently. The **Book A Doctor** system addresses these needs by providing a secure and convenient digital healthcare appointment management solution.
