Project Overview

Project Name: Book - A - Doctor

Project Description:

Book A Doctor is a web-based healthcare appointment management system developed using the MERN Stack. The platform enables patients to register, search for doctors, book appointments, upload medical reports, and track appointment status online. Doctors can manage their profiles and approve or reject appointment requests through a dedicated dashboard.

Project Version: Version 1.0

Testing Period: 10 March 2025 to 15 March 2025

Testing Scope

Features and Functionalities Tested:

- User Registration
- User Login and Authentication
- Doctor Registration
- Doctor Search and Filtering
- Appointment Booking
- Appointment Approval/Rejection
- Appointment Tracking
- Medical Report Upload
- Dashboard Access
- Role-Based Access Control

User Stories Tested:

- As a patient, I should be able to register and log in.
- As a patient, I should be able to search for doctors.

- As a patient, I should be able to book appointments.
- As a doctor, I should be able to manage appointment requests.
- As a user, I should be able to upload medical reports securely.

Testing Environment

URL/Location: <http://localhost:5173>

Credentials (if required):

Patient Account

- Username: patient@gmail.com
- Password: patient123

Doctor Account

- Username: doctor@gmail.com
- Password: doctor123

Test Cases

TC-001

Test Scenario: User Registration

Test Steps:

1. Open Registration Page.
2. Enter valid user details.
3. Click Register.

Expected Result: User account should be created successfully.

Actual Result: User account created and stored in database successfully.

Pass/Fail: Pass

TC-002

Test Scenario: User Login

Test Steps:

1. Open Login Page.
2. Enter valid credentials.

3. Click Login.

Expected Result: User should be redirected to dashboard.

Actual Result: Login successful and dashboard displayed.

Pass/Fail: Pass

TC-003

Test Scenario: Search Doctors

Test Steps:

1. Login as Patient.
2. Navigate to Doctor Search Page.
3. Search using specialization.

Expected Result: Matching doctors should be displayed.

Actual Result: Relevant doctors displayed successfully.

Pass/Fail: Pass

TC-004

Test Scenario: Book Appointment

Test Steps:

1. Select a doctor.
2. Choose appointment date.
3. Submit booking request.

Expected Result: Appointment should be booked successfully.

Actual Result: Appointment request created and stored in database.

Pass/Fail: Pass

TC-005

Test Scenario: Doctor Approves Appointment

Test Steps:

1. Login as Doctor.

2. Open Appointment Requests.
3. Approve appointment.

Expected Result: Appointment status should change to Approved.

Actual Result: Status updated successfully.

Pass/Fail: Pass

TC-006

Test Scenario: Upload Medical Report

Test Steps:

1. Login as Patient.
2. Navigate to Upload Report.
3. Select file and upload.

Expected Result: Report should be uploaded successfully.

Actual Result: File uploaded and linked to patient profile.

Pass/Fail: Pass

Bug Tracking

BG-001

Bug Description: Uploaded medical reports do not display immediately after page refresh.

Steps to Reproduce:

1. Upload a medical report.
2. Refresh the page.
3. Check uploaded reports section.

Severity: Medium

Status: Closed

Additional Feedback: Fixed by implementing proper data retrieval after refresh.

BG-002

Bug Description: Invalid login credentials display a generic error message.

Steps to Reproduce:

1. Enter incorrect email or password.
2. Click Login.

Severity: Low**Status:** Closed**Additional Feedback:** Improved error messages for better user experience.**Sign-off****Tester Name:** Riya Reddy Kasireddy**Date:** 15 March 2025**Signature:** Riya Reddy Kasireddy**Notes**

- All major functionalities were tested successfully.
- Both positive and negative test scenarios were executed.
- The application met the expected requirements and performance standards.
- Minor issues identified during testing were resolved.
- The system is ready for deployment and demonstration.
